Sellers **receive orders** from **customers** according to schedule

Merchant and Customer carry out the **transaction** process

The transaction is complete, the merchant **receives payment**, and provided a **rating** by the customer. FoodWise **gets 5% from total transaction as fee**.

FoodWise Main Features

WiseSaver

WiseEnd

WiseShop

WiseKeep

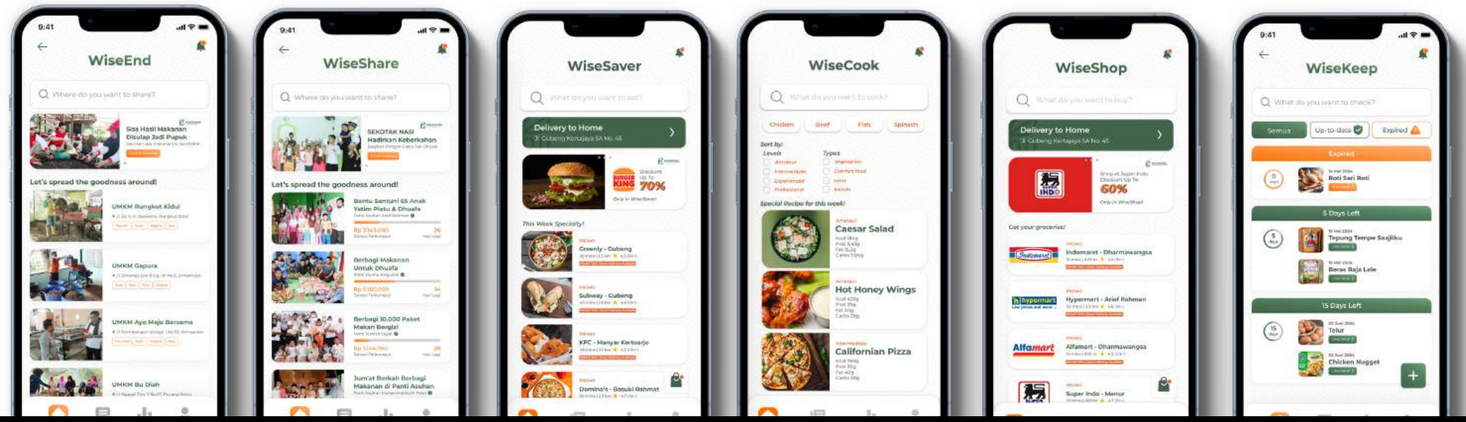

WiseCook

WiseShare

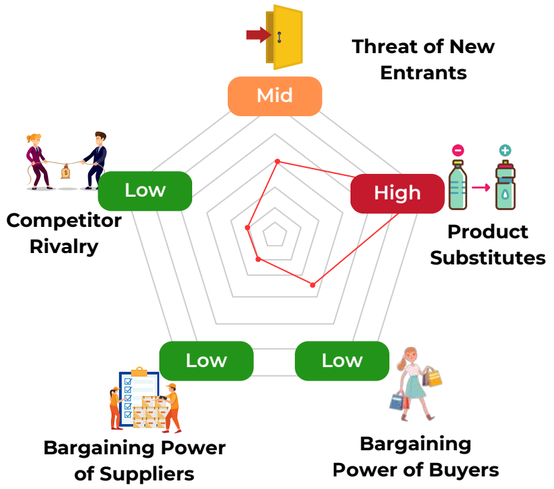

UI/UX

Feasibility Analysis

Let's Identify the External and Internal Aspects of FoodWise!

Porter Five Forces Analysis

Threat of New Entrants

B2B2C platform requires some technical expertise, and it highly complex. However, FoodWise's focus on **food waste reduction by selling unso unflod foodld food** creates a barrier for new entrants.

Product Substitutes

One of FoodWise's main challenges is **gaining users' trust in buying unsold food**. Meanwhile, there are many other options that can be used, such as **buying food directly or via other substitution platforms**

Competitor Rivalry

The FoodWise B2B2C food-waste reduction **niche is likely to have limited competition**. Established players in the broader online grocery or food delivery space might **not prioritize these specific aspects**.

Power of Suppliers

FoodWise likely deals with overstock food from various restaurants and retailers. These suppliers have an **incentive to sell excess inventory at a discount rather than throw it away**.

Power of Buyers

FoodWise targets **lower-middle-class individuals who are price-sensitive**. They have limited leverage as FoodWise offers unique value (discounted food) not readily available elsewhere.

SWOT Analysis

Strength

FoodWise can **reduce food waste** by connecting FnB business actors who often experience food overstock with consumers so that they can **reduce hunger**, creating **job opportunity**, **reduce unemployment**, and **reduce poverty** of course.

Weaknesses

Good logistics coordination and supply chain management for **safe and hygienic food** pick-up and delivery is a **challenge that FoodWise must overcome**, considering that **FnB products have a fairly short shelf life**.

Opportunity

The **rapid growth of internet users** means FoodWise can continue to develop its user base via digital marketing by actively advertising its application and **establishing partnerships with various stakeholders**.

Threats

The emergence of **new competitors in similar industries** could be a threat to FoodWaste. **Strict regulations** related to food safety can create additional obstacles and costs. It is possible that **some people are not used to the concept of buying unsold food and need time to build trust**.

PESTLE Analysis

Political

NFA Deputy II for Food and Nutrition Insecurity, Nyoto Suwignyo, said, "steps to **overcome food waste through Food Rescue are very important** and strategic."

Economics

Indonesia's **economic growth in the second quarter of 2023 was recorded at 5.17%** (yoy), an increase from growth in the previous quarter of 5.04% (Databoks).

Social

The increasing number of articles about "Food Waste" appearing on the internet shows that **people and businesses are increasingly aware of this issue**.

Technology

APJII announced that the number of **Indonesian internet users in 2024 will reach 221,563,479 users** from a total population of 278,696,200 in 2023.

Enviromental

Based on PPN/Bappenas research results, **Indonesia lost 23-48 million tons of wasted food** (food loss and waste/FLW) per year from 2000-2019.

Law

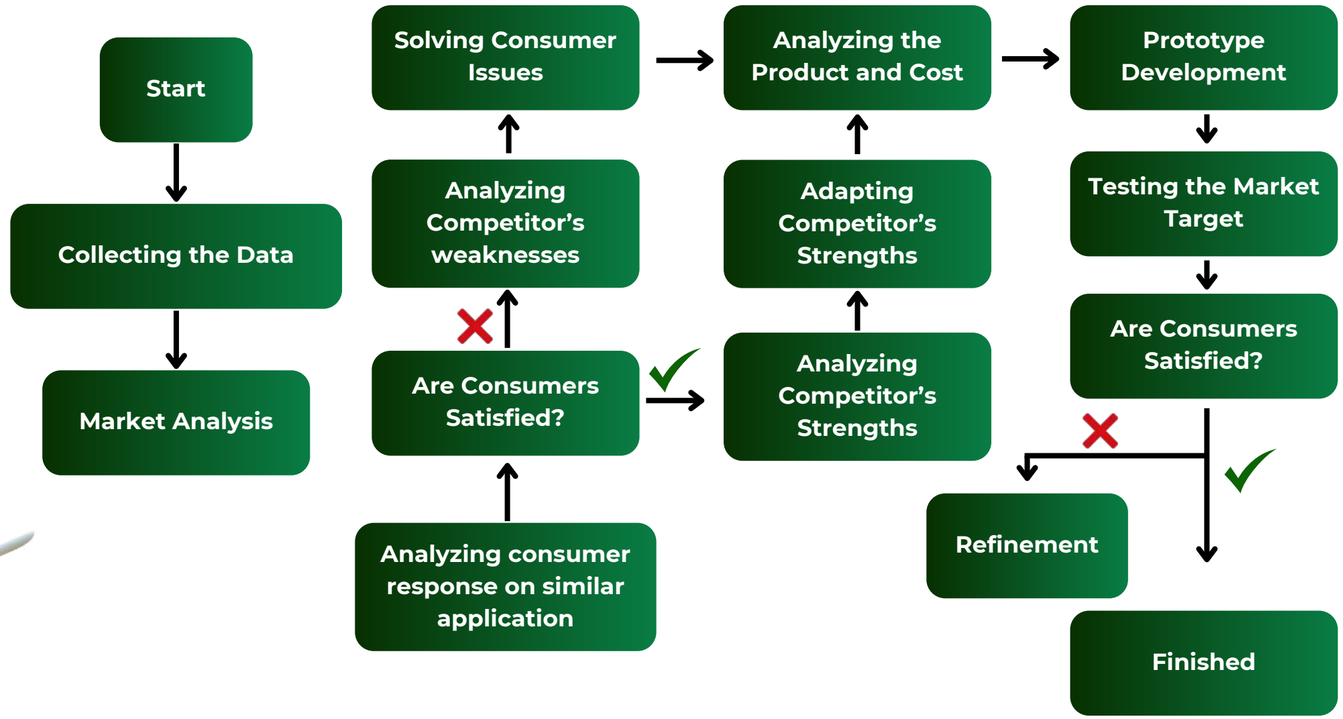

Law **No. 12 of 2012** (Food), **Law No. 20 of 2008** (Micro-Macro Business), **Law No. 20 Article 1 paragraph 13 of 2008** (Business partnerships)

Financial Feasibility

FoodWise Risk Management & Financial Analysis

Risk Management

	Challenges (Possible obstacles)	Mitigations (How to tackle obstacles)
1	• Restaurants may **serve/sell food that is not fit for consumption (stale)**, potentially **causing illness to consumers.**	• Consumer Feedback: **Consumers can rate the restaurant poorly** through the app. • FoodWise Actions: Issue a **warning and formal notice**; **terminate the partnership after two violations** and **report to authorities if illness occurs.**
2	• **Regulatory changes** can impact platform operations. • It is **challenging to keep up with the latest regulatory changes**.	• Regularly **monitor regulatory changes.** • **Consult with legal experts** to ensure the platform complies with regulations.
3	• Users may be **hesitant to use a new platform.** • It is challenging to build **user trust.**	• Ensure **the security and privacy of user data**. • Provide **high-quality services and build a strong reputation.**

Roadmap & Milestone

Long-Term Projection of FoodWise

1st Phase

Research & Development

- Marketing
- Operational Optimization
- Employee Recruitment

2nd Phase

Customer Acquisition

- Publish Foodwise (App Store, Google Play Store)
- Organic Customer Acquisition Methods
- Non-Organic Customer Acquisition Methods

3rd Phase

Product Optimization

- Massive Optimization (Software, Features, and Products)
- Use data collected over the past 3 years to guide development
- Identify features for future development

4th Phase

Digital & Fintech

- Feature Developments with WisePay, WiseCapital, and WisePayLater

5th Phase

Initial Public Offering (IPO)

- Aim to become the semi-quick commerce leader in Indonesia
- Conduct an Initial Public Offering (IPO)

Conclusion

Lets Make A Difference

Aland

Rachel & Radit

Meet Aland (FnB business owner) and Rachel & Radit (Gen-Z)

Aland owns a **busy Chinese restaurant** but faces **uncertain sales**. Rachel and Radit, Gen-Z food enthusiasts, **love eating out** but their parents have a **lower-middle income.** They experienced several problems, these problems are explained as follows:

Their Pain Points

Aland

Aland, the owner of a popular Chinese food restaurant, **frequently deals with overstocked food**. Despite the restaurant's steady stream of customers, unpredictable sales lead to **excess food that often ends up as waste in the trash bin**. This not only contributes to the **growing problem of food waste** but also represents a **loss of potential revenue** for his business.

Rachel & Radit

Rachel and Radit, like many of their Gen-Z peers, find **food purchased outside to be more expensive.** Despite this, dining out is a significant part of their lifestyle and social needs. They **enjoy exploring new culinary experiences** but **face financial constraints** due to their parents' lower-middle-income status.

Their Journey

WiseSaver

Aland used WiseSaver to sell excess food, **generating extra income and reducing waste**. **Rachel and Radit**, a budget-conscious teenagers, found affordable, nutritious meals through WiseSaver, **improving their diet on a budget.**

WiseShop

Aland as a FnB Business owner and Rachel & Radit as a Teenagers can utilize WiseShop to browse and **purchase these discounted groceries via WiseShop**, Either for **personal consumption** or **FnB businesses to buy their ingredients** for their products

WiseCook

In essence, WiseCook **helps Rachel & Radit** to **save money** by enabling them to **cook at home with the ingredients they have**, and it **assists Aland** in reducing waste by **promoting the use of overstocked ingredients through creative recipes.**

WiseEnd

WiseEnd helps Rachel & Radit save money by allowing them to **donate food waste** and **earn e-money or points for discounts**. It also partners with Aland to **collect their excess food**, which SMEs use to produce fertilizer, **promoting sustainability in agriculture while reducing waste.**

WiseKeep

WiseKeep **helps Rachel & Radit** save money by efficiently **managing their food inventory** and **assists Aland** in **reducing waste and optimizing their operations**. By encouraging effective food management practices, **WiseKeep supports financial savings and sustainability in the food industry.**

WiseShare

By facilitating **food donations and offering rewards**, WiseShare **helps Rachel and Radit save money on food** and **assists Aland in managing excess inventory** sustainably. This program **supports the community and reduces food waste.**
